

MATERNAL MEDICINE:

Conditions that complicate pregnancy care

This **one-day, live online course**, will be presented by a wide variety of interdisciplinary specialists together with maternal fetal medicine (MFM) sub-specialists to discuss case studies, and the latest evidence and key considerations for managing complications during pregnancy.

WHO SHOULD PARTICIPATE?

This multidisciplinary and interactive course is aimed at General Practitioner (GP) Obstetricians, Physicians, Midwives, Obstetric Anaesthetists and Obstetric Consultants and Trainees.

TOPICS

- Cardiac complications in pregnancy
- Renal disorders in pregnancy
- Haematological complications in pregnancy
- Respiratory complications in pregnancy
- Diabetes in pregnancy
- Maternal autoimmune complications in pregnancy
- Infections in pregnancy
- Gastroenterology - Inflammatory bowel disease
- Neurological complications in pregnancy

There will also be an opportunity for you to bring case-studies for further discussion.

MAIN FACILITATOR

Associate Professor Kirsten Palmer is a clinician researcher. She is a maternal fetal medicine sub-specialist and heads the Maternal Fetal Medicine unit at Monash Medical Centre, Monash Health; an incredible team of people that provide care for some of the most complex pregnancies in Victoria, Australia. She is also an Associate Professor with the Department of Obstetrics and Gynaecology at Monash University where she heads the Maternal and Perinatal Medicine Translational Research group.
