

Driving EFFECTIVE CHRONIC DISEASE MANAGEMENT through primary healthcare

Partnering for better health

Living with a chronic condition can dramatically affect an individual's health and has a significant cost impact on our primary and hospital care system.

In 2023, Australians lost an estimated 4.4 million years of healthy life due to chronic conditions, equivalent to 85% of the total disease burden in that year*.

Earlier detection, diagnosis and referral by primary health clinicians is critical to delaying development and better management of chronic health conditions to reduce potential demand on other parts of the health system.

Help drive an integrated and collaborative approach for better health outcomes for those living with a chronic condition in our region.

*AIHW analysis of ABDS 2023

LEARNING OBJECTIVES

- Use data to examine the rising prevalence and increasing health care costs of chronic disease
- Examine the role of integrated primary care in driving more effective chronic condition outcomes
- Explore the Primary Sense data analysis tool to improve decision support and planning
- Identify novel strategies for the prevention of chronic diseases such as the PHASES program

JOIN OUR GROWING COMMUNITY

Join our community of more than 1,300 healthcare professionals across the Sunshine Coast, Wide Bay and Central Queensland who are networking and learning together.

Dinner and refreshments provided.

Buderim | Tues 12 Nov 2024
Headland Golf Club
5:30 PM - 9:00 PM

Caloundra | Wed 13 Nov 2024
Caloundra RSL memorial Bowls Club
5:30 PM - 9:00 PM

Gympie | Tue 3 Dec 2024
Gunabul Homestead
5:30 PM - 9:00 PM

Noosa | Wed 4 Dec 2024
Noosa Springs Golf & Spa Resort
5:30 PM - 9:00 PM
