Interrupt intergenerational patterns of violence

Understand post seperation risk for children

Learn the essentials of supervision, mentoring and sustaining workers

Support women to navigate the complex legal and community services system

Examine current law reform debates and implementation plans

Understand the misidentification and the risks of criminalisation

Strengthening responses to coercive control, improving victim survivor agency & supporting intersectionality

Every day, almost 10 women are hospitalised for assault injuries perpetrated by a spouse or domestic partner and one woman is killed nearly every week due to family violence. In addition, an estimated 2.2 million adult women (23 percent of the adult female population) have experienced coercive control by a partner at some point since the age of 15.

On 17 October 2022, the Australian, state and territory governments released the National Plan to End Violence against Women and Children 2022–2032 which will inform and guide action towards ending violence against women and children over the next 10 years. In addition, pending reforms in family law and ongoing discussion regarding the criminalisation of coercive control are driving change, growth and innovation across the sector.

The Hatchery Conference was just what I needed to fill the gaps of my understanding on coercive control and family abuse. It was so informative and extended to include the whole family and that all areas need to be addressed to improve all members in the relationship. It surpassed my expectations."

Tracey Dunlop, Educator, Dunlop Day Care

The **Ending Coercive Control & Family Violence Against All Women summit** will bring together key stakeholders from across the sector with the purpose of driving forward real change in the way services respond to family violence and coercive control and engage women to support their safety and healing.

It creates a genuine opportunity for collective education, awareness-building and relationship building. This summit will focus on early intervention, crisis response and recovery through the lens of coercive control and has three key themes that will flow throughout the two main summit days.

- · Voice, agency and belief
- Innovation, education, and the future
- Reform, equity and economy

Practitioners, experts, researchers and advocates will showcase practice-led responses for working with women, intersectionality and abuse, changes in family law, post separation coercive control, supporting children & working with disabled, Aboriginal & CALD communities.

Who will attend

Representatives of the Community, Government, Police & Justice sectors with responsibilities for:

- Family/Domestic Violence Services
- Women's Services, Shelters & Refuges
- Refugee, Migrant and Immigration Services Mental Health Services
- **Children's Services & Child Protection**
- Men's Behaviour Change
- Alcohol & other Drugs
- Family Services/ Relationship & Counselling Legislative change and reform with respect to family law and coercive control

2.45pm Afternoon tea

3.15pm Understanding how perpetrators weaponise government systems to enact financial abuse

- Exploring the time and effort women must expend to work within often abusive government systems such as child support, with little financial benefit and at great psychological cost
- How government systems intersect to create ripples of abuse that permeate women's financial lives, making the causes of harm and appropriate responses difficult to determine
- The National Plan to Reduce Violence against Women and their Children 2022-2032 provides an opportunity to demand better government systems to identify, address and prevent financial abuse

Prof. Kay Cook

Associate Dean of Research in the School of Social Sciences, Media, Film and Education, **Swinburne University of Technology** & Member, **Federal Economic Inclusion Advisory Committee**

3.55pm Coercive control, systems abuse, family law matters & reform

- Reviewing the 2022 project AIFS completed (ANROWS-funded) on compliance with and enforcement of family law parenting orders
- Exploring the findings of the project including the finding that demonstrates non-compliance arises in circumstances involving difficult relationship dynamics, including family violence and safety concerns
- Examining other finding indications that some parenting arrangements are developed in a way that is not sufficiently attentive to the circumstances of the individual child
- Assessing how in some instances litigation, including contravention applications, are part of a
 pattern of systems abuse in the context of coercive control
- The Family Law Amendment Bill 2023 was introduced into the House of Representatives on March 29, 2023: Considering reforms in the context of the findings of the Compliance with and Enforcement of Family Law Parenting Orders Project

Supercharge your learning experience with two interactive in-person workshops

Workshop A

Adolescent Violence in the Home (AVITH): How to support safe & respectful family relationships

28 July 2023, 9.00am - 12.00pm AEST Sydney Boulevard Hotel | Gadigal Land/Sydney - Delivered in-person for maximum interactivity

Adolescent violence in the home is an extremely nuanced issue. It is recognised as a distinct form of violence, different from adult-perpetrated family violence, and it requires a response that accounts for adolescence as a developmental stage and a relational response. To date, there has been a lack of program evaluation measuring outcomes for adolescents using violence and those who experience it.

This workshop offers a practice approach to supporting these adolescents and their families. It identifies a model of care for family-based intervention where a young person is using violence against a parent/carer or sibling. It recognises that AVITH frequently occurs in the context of intergenerational patterns of abuse and violence (and therefore trauma) and/or where a young person is neurodiverse.

The presenters will contribute elements of their personal experience to compare and contrast research findings related to AVITH.

Attend & learn:

- Consider and explore a definition of AVITH, including where a young person is neurodiverse
- Consider similarities & differences between adult and AVITH
- Consider assessment, including risk assessment and safety planning
- Understand core elements of a best practice model in responding to AVITH, including the importance of holding a lens of intersectionality

- Understand determinants which support the use of violence by a young person
- Understand the principles in working with AVITH to promote family safety, trust and respect
- Learn how to engage young people and parents/carers in assessments and planning
- Discuss specific strategies where a young person is neurodiverse

Workshop B

How to take an intentional approach to build relationships & partnerships and identify opportunities for collaboration

28 July 2023, 1.00pm - 4.00pm AEST Sydney - Delivered in-person for maximum interactivity

Family and domestic violence is a complex social issue that requires coordinated efforts across the community to address it effectively and responsively.

Women's Community Shelters CEO, Annabelle Daniel OAM, is often approached by shelters, practitioners and other FDV services and asked how to build strong partnerships, coordinate efforts across the community and develop and strengthen new and existing relationships both within the sector but also from external bodies (including businesses and corporates).

Professionals in this space wish to make sure that every day they are working to make more of a difference. However, this skillset is not often trained, and many practitioners feel uncomfortable and unsure of where to begin or how to begin. They aren't sure how to take ownership of the process and feel ill-equipped to drive the process of building and strengthening relationships/partnerships.

Would you like to be better able to:

- Bring in government, community, business and philanthropy to support long term aims?
- Communicate your goals, intentions and purpose effectively?
- Better use deep knowledge of our stakeholders and communities to end violence against women and children?
- Connect better to businesses and corporates?
- Engage people and communities outside our sector to create the change we want to see?

Attend & learn:

- Drive engagement with other community services: learn how to partner with others to help build community-wide understanding of domestic & family violence
- Build diverse partnerships
- Better leverage available resources

- Create environments that enable friends and family, the community and other services to intervene appropriately and support survivors
- Develop and strengthen new and existing relationships
- Understand how to plan, implement and sustain impactful and meaningful partnerships
