

Activity Work Plan 2019-2022:

Primary Mental Health Care Funding

Central Queensland, Wide Bay, Sunshine Coast PHN

1. (a) Planned activities for 2019-20 to 2021-22

- Primary Mental Health and Suicide Prevention
 Funding
- Indigenous Mental Health Funding
- Response to PFAS Funding

PHNs must use the table below to outline the activities proposed to be undertaken within the period 2019-2022.

Proposed Activities activity	- copy and complete the table as many times as necessary to report on each
Mental Health Priority Area	Priority area 1: Low intensity mental health services
ACTIVITY TITLE	PMH-P1: Low intensity mental health services.
ACTIVITY TITLE	Rate of regional population receiving PHN commissioned low intensity psychological interventions.
Existing, Modified, or New	Existing Activity
Activity	PMH-P1 Low intensity mental health services
PHN Program Key Priority Area	Mental Health
Needs Assessment	Section 4: Priorities, Options and Opportunities. Commission MH services across the stepped care model with a focus on
Priority	identified priority populations, P109.
	Low intensity mental health services aim to increase overall community access to evidence based psychological interventions for people with, or at risk of, mild mental illness who do not require traditional services.
	Increasing access to low intensity services is fundamental to building a stepped care model of mental health service delivery.
Aim of Activity	Our PHN will continue to build on our central intake and assessment service to better direct referrals to low intensity where clinically suited to achieve a better targeting of resources. In 2019-20 we will expand Low Intensity CBT (LiCBT) into the headspace model to offer this modality which may increase access for young people not within an accessible distance of a headspace centre.
Description of Activity	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method.

Procure:

1) PHN will commission low intensity services from Artius Health to deliver within the PHN region (PMH-P1.3).

PHN has contracted Artius Health to provide cost effective, clinically appropriate mental health treatment for people at risk or with mild to moderate (non-complex) mental illness including:

- wider accessibility of evidence based mental health services through promotion of digital mental health services available from Head to Health and/or direct service delivery;
- a central intake and assessment service accepting self-directed referrals as well as referrals from carers, GPs and providers where consent has been obtained;
- a model of care based on LiCBT delivered flexibly through either or a combination of face to face, telephone and group work;
- ongoing training for LiCBT workforce providing access for other mental health services providers where places and capacity permit; and
- clinical governance and supervision of LiCBT workforce by suitably qualified and credentialed clinicians.
- 2) PHN will commission LiCBT training and services for:
- 2a) headspaces to be project managed through a headspace lead agency (PMH-P1.6).

PHN has contracted United Synergies, a headspace lead agency, to coordinate training for headspace staff in the PHN region to undertake LiCBT training. The lead agency has been contracted to:

- project manage the training across all headspace agencies;
- ensure that headspace centres engage in the opportunity to train non mental health professionals and their clinical leads to offer LiCBT; and
- Share learnings and evaluate the effectiveness of a LiCBT model in headspace through quarterly headspace capacity building forums.

2b) mental health workers working in an approved panel of PHN service providers in hard to reach areas where limited workforce exists (PMH-P1.7).

PHN has contracted a low intensity training provider to deliver training for a suitably placed mental health workforce to deliver LiCBT in hard to reach areas within the PHN region.

3) PHN will provide education on Step Care, a screening tool for general practice staff including, GPs, practice managers, receptionists and nurses.

Step Care is a digital mental health screening tool that can be used to identify patients in GP waiting rooms at risk or experiencing mental ill health. Step Care will continue to be delivered in ten general practices across the PHN region with a review in Year 1 to identify the merits of broader rollout in the PHN region for Years 2 and 3 (PMH-P1.1).

Provide:

1) PHN MHAOD Health System Integration Officer will lead project management of the Step Care education and training (PMH-P1.2).

Services by our PHN in 2016-17 and 2017-18. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation at monitoring. 2a) headspace lead agencies in the PHN region and headspace National Office were consulted in 2018-19 through a capacity building forum. 2b) co-design held with communities impacted by situational crisis. 3) As for 1) above. List stakeholders that will be involved in designing and/or implementing the activity, including stakeholders such as Local Health Networks, state/territor governments, or other relevant support services. Describe the role of each party. Stakeholders Role General practice staff and allied health professionals Regional MHAOD Council High level partnership and joint planning governance MHAOD Strategic Collaboratives WHAOD Strategic Collaboratives Local level partnerships to achieve implementation, local coordination Primary health care providers, NGO providers, peak bodies, NDIS, NGO stakeholders within PHN region						
Target population cohort 2a) Young people aged between 12 -25, with, or at risk of, mild mental illness. 3) People with, or at risk of, mild mental illness. 3) People with, or at risk of, mild mental illness accessing general practices offering the Step Care platform. Indigenous specific Is this activity targeted to, or predominantly supporting, Aboriginal and Torro Strait Islander people? No If yes, briefly describe how this activity will engage with the Indigenous sector 1) Whole PHN region. 2) headspace centre locations in Rockhampton, Gladstone, Bundaberg, Herve Bay, Gympie, Maroochydore LGAs. 3) Rockhampton LGA, North Burnett LGA, Banana LGA, Central Highlands LG, Sunshine Coast LGA. 1) Comprehensive stakeholder consultations were conducted on low intensit services by our PHN in 2016-17 and 2017-18. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation amonitoring. 2a) headspace lead agencies in the PHN region and headspace National Office were consulted in 2018-19 through a capacity building forum. 2b) co-design held with communities impacted by situational crisis. 3) As for 1) above. Proposed Activities activity	s - copy and complete the table as many times as necessary to report on each
Mental Health Priority Area	Priority area 2: Child and youth mental health services
	PMH-P2: Child and youth mental health services.
ACTIVITY TITLE	Rate of regional population receiving PHN commissioned psychological therapies delivered by mental health professionals.
Existing,	Existing Activity
Modified, or New Activity	PMH-P2 Child and youth mental health services
PHN Program Key Priority Area	Mental Health
Needs Assessment Priority	Section 4: Priorities, Options and Opportunities Commission services to improve the mental health of young people, P110.
Aim of Activity	The aim of activity is to improve young people's access to mental health care that is tailored to their needs through: • Appropriate mental health services are delivered by qualified mental health professionals and are tailored to the needs of young people. • Early intervention to reduce the prevalence and impact of mental illness.
	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method.
	Provide:
	1) Regional capacity building forum for headspace lead agencies commissioned in the PHN region (PMH-P2.2).
Description of Activity	PHN will coordinate quarterly forums with headspace organisations to progress workforce development, partnerships and community integration. Forums will focus on sharing information and resources between headspace services including sustainable business models.
·	2) PHN through its partnership with headspace National Office will provide additional resources to expand outreach models from headspace (PMH-P2.5).
	Procure:
	1) headspace services will be delivered (PMH-P2.3) through 1:1 structured psychological therapies, and group based in the following geographical areas: Rockhampton: LiveBetter Gladstone: Roseberry Community Services Bundaberg, Maroochydore, Gympie: United Synergies Hervey Bay: Mission Australia
	2) Youth severe mental health services will be delivered by Artius Health in partnership with headspaces and HHS Child and Youth Mental Health Services

	(CYMHS). Services will provide care coordination through regular integration meetings and address the cohort at risk of falling through the gap between headspace and CYMHS (PMH-P2.4).			
Target population cohort	Young people aged between 12 - 25, with, or at risk of, mild mental illness. Young people aged between 12 - 25 with moderate to severe mental illness whose treatment needs can be managed in primary health care.			
Indigenous specific	No			
Coverage	headspace centre locations in Rockhampton, Gladstone, Bundaberg, Hervey Bay, Gympie, Maroochydore LGAs. Whole PHN region.			
Consultation	1) Comprehensive stakeholder consultations were conducted on headspace services and youth severe mental health services by our PHN in 2016-17 and 2017-18. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation and monitoring. 2) headspace lead agencies in the PHN region and headspace National Office were consulted in 2018-19 through a capacity building forum.

Mental Health Priority Area	Priority area 3: Psychological therapies for rural and remote, under-serviced and / or hard to reach groups
ACTIVITY TITLE	PMH-P3: Psychological therapies for rural and remote, under-serviced and / or hard to reach groups. Rate of regional population receiving PHN commissioned psychological
	therapies delivered by mental health professionals.
Existing, Modified, or New Activity	Existing Activity PMH-P3 Psychological therapies for rural and remote, under-serviced and / or hard to reach groups.
PHN Program Key Priority Area	Mental Health
Needs Assessment Priority	Section 4: Priorities, Options and Opportunities Commission MH services across the stepped care model with a focus on identified priority populations, P109.
Aim of Activity	The aim of this activity is to reduce service gaps and inequities across the region by commissioning mental health services targeting selected underserviced populations. These services are provided both where there are limited or not easily accessible Medicare Benefits Schedule funded psychological services or to particular subpopulations that are not accessing available services to the same extent as the general population.
	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method. Procure:
	1) PHN will contract Artius Health to provide (PMH-P3.3) psychological therapies in the region including:
Description of Activity	1a) Increase access for underserviced groups through targets / demand management within the central intake system.
receivity	1b) Allocate resources to ensure priority groups and targets area KPIs are being reached.
	1c) Monitor the ongoing and fluctuating need in the PHN region to ensure services can ramp up and down as required.
	1d) Develop the capacity of the workforce in the rural and remote areas of the PHN region.
	2) PHN has contracted Lifespan Health to pilot and develop mental health services in residential aged care facilities for the Residential Aged Care Initiative (PMH-P3.5).

These services commenced in March 2019 and will:

- 2a) Deliver a blended model of Low intensity and psychological therapies into nominated residential aged care facilities.
- 2b) Engage with relevant stakeholders in order to work through referral pathways, assessment and service delivery aspects to inform broader rollout of the initiative over year 2 (2019-20), 3 (2020-21) and 4 (2021-22).
- 2c) Identify and target education for staff within the facility and clinicians to establish a best practice foundation (education component no more than 10% of funding allocation).

In addition, PHN will continue to update the following activities commenced in 2018-19:

- 2d) update service mapping of RACFs in the PHN region to monitor on boarding and update changes in baseline of service coverage.
- 2e) continue with co-design process commenced in early 2019 that involves targeted stakeholder engagement to ensure a wide spectrum of views are taken into account across the PHN region.
- 2f) feedback lessons learned from lead providers and continue to develop a community of practice model in broader rollout over year three years.
- 2g) In 2019-20 PHN will commence the defined procurement approach developed in 2018-19 for on-boarding additional mental health services that meet the criteria for in-reach into RACFs.

The initiative will ramp each year through to full program coverage by 30 June 2022.

3) PHN has contracted Artius Health to administer the Sunshine Coast Eating Disorders Trial site for 2019-20 and 2020-21 (PMH-P3.6). The provider will manage program intake and financial reimbursements to

approved credentialed primary health care professionals. The model of care will include:

- 3a) Single session eating disorders assessment by a psychologist or other eligible mental health profession.
- 3b) An extended number of sessions of psychotherapy after exhaustion of a current provision under Better Access.
- 3c) Up to 20 sessions of dietetic care per year.
- 3d) Improved case coordination with the addition of between 6 and 12 case conference sessions per year coordinated by a GP or by a psychiatrist.
- 3e) Working in collaboration with Butterfly Foundation and PHN and the independent evaluation and research (coordinated by Butterfly).

Provide:

1) Provide ongoing education on referrals pathways to general practice (PMH-P3.2) through HealthPathways and PHN Practice Support Officers for:

	1a) Hard to reach groups.1b) Mental health in reach in to residential aged care.1c) Eating Disorders Trial.	
Target population cohort	Eligibility criteria for access to psychological services for underserviced and hard to reach groups are: Clients residing in the Central Queensland, Wide Bay and Sunshine Coast PHN region; Clients with moderate or severe mental health illness; Clients part of underserviced or hard to reach target group; Funding for sub-area and service stream not exhausted; and Client consents to participate in the program. Underserviced Target Groups include: Rural and remote residents People from culturally and linguistically diverse backgrounds (CALD) Aboriginal and Torres Strait islander people People who are members of the LGBTI community Women with perinatal depression Financially disadvantaged without availability to bulk billing psychologists Victims of domestic violence Homeless Other hard to reach groups not elsewhere classified Psychological treatment services for people with mental illness living in residential aged care facilities:	
	 Clients residing in residential aged care facilities at risk of or with mental illness Sunshine Coast Eating Disorders Trial: Clients must be living in the Sunshine Coast region Meet the criteria for an eating disorder (AN, BN, BED, OSFED) as defined in the DSM-5 Have no significant medical or psychiatric comorbidities that would affect treatment Be assessed as having low to moderate risk of suicide or self-harm 	
Indigenous specific	No	
Coverage	1) Whole PHN region 2) Sunshine Coast and Gympie 3) Sunshine Coast and Gympie	
Consultation	Psychological Services for Hard to Reach Groups Comprehensive stakeholder consultations were conducted on low intensity services by our PHN in 2016-17 and 2017-18. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation and monitoring. Psychological treatment services for people with mental illness living in residential aged care facilities	

Stakeholder consultations for psychological treatment services for people with mental illness living in residential aged care facilities were commenced in 2018 with existing membership of: MHAOD Strategic Collaboratives Community Advisory Councils and Clinical Councils **Integrated Care Alliance** In 2019 consultation will be expanded and targeted towards the broader range of stakeholders as described in the guidance material. **Sunshine Coast Eating Disorders Trial** PHN will support Butterfly Foundation in its consultation role to provide information through: PHN participation in consultation Providing information through PHN information channels Facilitating introductions with relevant stakeholders Co-Chair of the Sunshine Coast Eating Disorders Trial Steering Group **Stakeholders** Role General practice staff and allied health Subject matter experts professionals Regional MHAOD Council High level partnership and joint planning governance MHAOD Strategic Collaboratives Local level partnerships to achieve implementation, local Collaboration coordination Primary health care providers, NGO Subject matter experts providers, peak bodies, NDIS, NGO stakeholders within PHN region Consumers and carers Lived experience subject matter experts Provide the anticipated activity start and completion dates (including the planning and procurement cycle): Activity start date: 1/07/2019 Activity end date: 30/06/2022 Activity milestone If applicable, provide anticipated service delivery start and completion dates details/ Duration (excluding the planning and procurement cycle): Service delivery start date: July 2019 Service delivery end date: June 2022 Any other relevant milestones? 1. Please identify your intended procurement approach for commissioning services under this activity: Commissioning ☐ Not yet known method and □ Continuing service provider / contract extension approach to ☐ Direct engagement. If selecting this option, provide justification for market direct engagement, and if applicable, the length of time the commissioned provider has provided this service, and their performance to date.

Mental Health Priority Area	Priority area 4: Mental health services for people with severe and complex mental illness including care packages
ACTIVITY TITLE	PMH-P4: Mental health services for people with severe and complex mental illness including care packages. Rate of regional population receiving PHN commissioned clinical care coordination services for people with severe and complex mental illness.
Existing, Modified, or New Activity	Existing Activity
PHN Program Key Priority Area	Mental Health
Needs Assessment Priority	Section 4: Priorities, Options and Opportunities Commission MH services across the stepped care model with a focus on identified priority populations, P109.
Aim of Activity	The aim of this activity is to commission clinical mental health services to meet the needs of people with severe mental illness, whose care can be appropriately managed in a primary care setting. This will include making optimal use of the available allied mental health services to support clinical coordination.
	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method.
Description of	Provide: 1) PHN MHAOD Practice Support Officers will project manage information and education delivery to general practice on NDIS and stepped care options for people with severe mental illness including early psychosis and co-morbidity guidelines (PMH-P4.4). Procure:
Activity	1) PHN has contracted the following providers to deliver mental health services for people with severe and complex mental illness:
	1a) Artius Health to deliver services within Sunshine Coast and Wide Bay (excluding Maryborough) (PMH-P4.7).
	1b) Monsour Clinic to deliver services within Maryborough (PMH-P4.8).
	1c) Central Queensland Rural Division of General Practice to deliver services for Gladstone, Banana Shire and Central Highlands (PMH-P4.9).
	These services will:

Complement and enhance existing general practice, psychiatrist and allied mental health professional services available through the MBS; Not duplicate HHS specialist mental health services, other nongovernment organisation mental health services or providers funded through the Medicare Benefits Schedule; o Provide individualised services delivered under a recovery, traumainformed philosophy; • Work closely with general practices to ensure the physical health needs of consumers are met; o Provide care coordination to integrate primary care services with community based private psychiatry services and HHS specialist mental health services for individuals; • Work within defined referral pathways in the PHN region to enable and support consumers to seamlessly transition between services as their needs change; Provide services in an efficient and cost-effective manner o Be responsive to clients who are at risk of suicide or self-harm and provide brief intervention, safety plans and escalate where clinically appropriate; o Work with NDIA Local Area Coordinators to consider service access for people not meeting the National Disability Insurance Scheme (NDIS) criteria. Describe the cohort that this activity will target. People with severe and complex mental illness whose needs can be managed in primary health care. The target cohort is expected to need ongoing treatment and management of their mental disorder over the next 2 years. In addition, specific eligibility criteria for clinical care coordination for people with severe mental health illness include: The client has been diagnosed with a mental disorder according to the criteria defined in the World Health Organisation Diagnostic and Target population Management Guidelines for Mental Health Disorders in Primary Care: cohort ICD 10 Chapter V Primary Care Version, or the Diagnostic and Statistical Manual of Mental Health Disorders - Fifth Edition (DSM-5); The client's disorder is significantly impacting their social, personal and work life; The client has been to hospital at least once for treatment of their mental disorder, or they are at risk of needing hospitalisation in the future if appropriate treatment and care is not provided; The client is expected to need ongoing treatment and management of their mental disorder over the next two years. Is this activity targeted to, or predominantly supporting, Aboriginal and Torres Strait Islander people? Indigenous specific No If yes, briefly describe how this activity will engage with the Indigenous sector. Whole PHN region Coverage

Proposed Activities activity	s - copy and complete the table as many times as necessary to report on each
Mental Health Priority Area	Priority area 5: Community based suicide prevention activities
	PMH-P5: Regional approach to suicide prevention.
ACTIVITY TITLE	Proportion of people referred to PHN commissioned services due to a recent suicide attempt or because they were at risk of suicide followed up within 7 days of referral.
Existing,	Indicate if this is an existing activity, modified activity, or a new activity.
Modified, or New Activity	Existing Activity
PHN Program Key Priority Area	Mental Health
Needs Assessment Priority	Section 4: Priorities, Options and Opportunities Development of a coordinated and integrated system for suicide prevention, P107. Commission MH services across the stepped care model with a focus on identified priority populations, P109. Increase access to culturally appropriate mental health services for Aboriginal and Torres Strait Islander people – mental health and suicide prevention P120.
Aim of Activity	The aim of this activity is to take a lead role in planning and commissioning community-based suicide prevention activities. There is a particular imperative to improve follow-up for people in the high risk period following a suicide attempt. Individuals are known to be particularly vulnerable in the period between leaving hospital and transitioning to community mental health care. Planning will be undertaken in partnership with HHSs and other local organisations to ensure that there are no gaps in services and that referral pathways are clearly defined.
Description of Activity	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method. Provide: 1) PHN will provide leadership and support for local suicide prevention networks to coordinate activities as part of a wider community based suicide prevention action plan. Suicide Prevention Working Groups of the Strategic Collaboratives will implement and monitor community based suicide prevention action plans and report back to the Strategic Collaborative (PMH-P5.1). 2) PHN will ensure that agreed referral pathways for suicide prevention are maintained and updated in HealthPathways including training for GPs on best practice (PMH-P5.2).
	Procure:

	1) Central Queensland Rural Health will coordinate suicide prevention community action plans and resilience and crisis response plans developed in LGA areas for Central Queensland. Plans will ensure that activities are culturally appropriate for Aboriginal and Torres Strait Islander People (PMH-P5.3).
	2) Artius Health will deliver aftercare services for people at risk, or post a suicide attempt. This will include care coordination for a period of approx. three months to ensure that linkages with clinical and psychosocial supports are in place (PMH-P5.4).
	3) Caloundra Community Centre will coordinate suicide prevention activities in the hinterland region of the Sunshine Coast and coordinate Gatekeeper training across neighbourhood centres in the Sunshine Coast area (PMH-P5.5).
	4) PHN will procure gatekeeper training delivered through a community campaign aimed creating a safety net in the community of informed citizens who can recognise, persuade and refer someone at risk of suicide to get help (PMH-P5.6).
	5) In 2019-20 PHN will establish a dedicated 'Resilience and Crisis Response Fund for Communities' in order to procure, as required, rapid response services, interventions and education for communities impacted by suicide and adverse events. In year one the fund will draw funds from underspends in 2018-19 together as well as an annual allocation. The accessibility of funding will be issued by Request for Proposal (PMH-P5.7).
Target population cohort	Describe the cohort that this activity will target. Whole of population Men aged between 25-50 Aboriginal and Torres Strait Islander people
Indigenous specific	Yes The Aboriginal and Torres Strait Islander Engagement Coordinator will liaise regularly with community through formal and informal engagement channels.
Coverage	Whole PHN region
Consultation	Comprehensive stakeholder consultations were conducted on suicide prevention services by our PHN in 2016-17 and 2017-18. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation and monitoring. Coordinated suicide prevention activities will have ongoing engagement with
	local suicide prevention activities will have origoning engagement with local suicide prevention working groups or reference groups to inform the implementation of activity, gatekeeper training, and support and promote integrated services and referral pathways.

Mental Health Priority Area	Priority area 6: Aboriginal and Torres Strait Islander mental health services
	PMH-P6: Aboriginal and Torres Strait Islander mental health services.
ACTIVITY TITLE	Proportion of PHN commissioned mental health services delivered to the regional Aboriginal and Torres Strait Islander population that were culturally appropriate.
Existing,	Indicate if this is an existing activity, modified activity, or a new activity.
Modified, or New	Existing Activity
Activity	PMH-P6 Aboriginal and Torres Strait Islander mental health services
PHN Program Key Priority Area	Mental Health
Needs Assessment Priority	Section 4: Priorities, Options and Opportunities Increase access to culturally appropriate mental health services for Aboriginal and Torres Strait Islander people – mental health and suicide prevention P120. Develop a coordinated and integrated system for suicide prevention, P107. Commission MH services across the stepped care model with a focus on identified priority populations, P109.
Aim of Activity	The aim of this activity is to provide tailored and culturally appropriate treatment for Aboriginal and Torres Strait Islander people. Services will be reported on how mainstream and Aboriginal and Torres Strait Islander Services have been delivered in recognition of the six domains and focus areas of the Cultural Respect Framework for Aboriginal and Torres Strait Islander Health 2016-26.
	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method.
	Provide:
Description of Activity	1) PHN will coordinate an annual forum with Aboriginal and Torres Strait Islander organisations and peak bodies in the region to progress workforce development, partnerships and community integration (PMH-P6.1).
	2) PHN will provide capacity building to the Aboriginal and Torres Strait Islander mental health service providers by continuing to work with the sector to develop relationships and drive principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the Cultural Respect Framework 2016-26 (PMH-P6.11).
	Procure:
	1) Culturally appropriate services will be delivered through 1:1 structured psychological therapies, group based, peer kinship and cultural healing in the following geographical areas:
	Gympie: North Coast Corporation for Aboriginal Community Health (PMH-P6.5)

	Rockhampton and Banana Shire: Bidgerdii consortium (PMH-P6.6) Gladstone and Biloela: Nhulundu (PMH-P6.7) Wide Bay: Artius Health (PMH-P6.9)				
	2) The annual PHN and Aboriginal and Torres Strait Islander regional forum will review the priority areas for the Joint Regional Plan including updated priorities for workforce development and capacity building. The pool of resources will be allocated based on the forum outcomes. Expressions of interest or direct allocations will be made on that basis (PMH-P6.10).				
	3) Sponsorship is set aside annually for organisations in the region holding events around significant Aboriginal and Torres Strait Islander days. Expressions of interest will be sought in December and close in January for allocations (PMH-P6.2).				
	4) PHN will work with Woorabinda Council and a Woorabinda community-led entity directly to establish culturally appropriate mental health services within the community that are led and coordinated by the Woorabinda community-led entity. The Woorabinda community-led entity will work with other funded services to ensure that incoming services are targeting resources in the most effective way for their community (PMH-P6.8).				
Target population cohort	Aboriginal and Torres Strait Islander population.				
	Is this activity targeted to, or predominantly supporting, Aboriginal and Torres Strait Islander people?				
Indigenous	Yes				
specific	Commissioned service providers and the PHN Aboriginal and Torres Strait Islander Engagement Coordinator will engage formally and informally with community and service providers.				
Coverage	Whole PHN region				
Consultation	Comprehensive stakeholder consultations were conducted on low intensity services by our PHN in 2016-17, 2017-18 and 2018-19. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation and monitoring.

Priority Area	Priority area 7: Stepped care approach
	PMH-P7: Stepped care approach.
ACTIVITY TITLE	Formalised partnerships with other regional service providers to support integrated regional planning and service delivery.
Existing, Modified, or New	Existing Activity
Activity	PMH-P7 Stepped care approach
PHN Program Key Priority Area	Mental Health
Needs Assessment Priority	Section 4: Priorities, Options and Opportunities Establish formalised integrated care activities, data sharing and co- commissioning as a next step to joint regional plan, P107. Development of a coordinated and integrated system for suicide prevention, P107. Commission MH services across the stepped care model with identified focus on identified priority populations, P109. Sector engagement and strategy development in the context of the regional plan for MHAOD services, P113.
	Our PHN understands that we are undertaking a broader role in the provision of mental health and suicide prevention service delivery by assessing regional needs and planning services, as well as in the commissioning services in identified regions of need. Services commissioned by our PHN must fit within a complex framework of current mental health and related services, supplementing services provided by a broad variety of other service providers across a region spanning 161,108 km2, 842,057 people of which 29,576 identify as Aboriginal and/or Torres Strait Islander.
Aim of Activity	Coordinated service delivery by multiple agencies is also essential to best address the needs of those with more severe and/or persistent mental illness, particularly those with more complex needs.
	Our PHN will continue to develop a comprehensive regional mental health and suicide prevention plan which will/has engaged other agencies in its development. We understand that this is also a formal requirement of the 5 th National Mental Health and Suicide Prevention Plan, with all regional plans expected to be completed by mid-2020.
Description of Activity	As part of our commissioning approach, the PHN has defined where we procure health services, partner with other agencies to implement health system solutions, and where our staff provide health system support services (e.g. general practice support, allied health engagement, education, digital health leadership). This approach allows us to provide clarity and transparency to our stakeholders. This activity work plan uses this method. Partner:

1) Partner with Regional Mental Health and Alcohol and Other Drug Council and Strategic Collaboratives to facilitate a regional and local level stepped care approach (PMH-P7.1).

The aim of the Regional MHAOD Council is to ensure state- and PHN-commissioned funds are used most effectively to facilitate an integrated system of care in accordance with the 5th National Mental Health and Suicide Prevention Plan and Connecting Care to Recovery. In addition, Strategic Collaboratives assist in reviewing data and ensuring that services best targeted to local need. The National Mental Health Service Planning Framework Report will continue to guide activities.

Provide:

1) Provide clinical and referral pathway guidance through **Health Pathways** (PMH-P7.3).

The aim of **HealthPathways** is to improve client transition through the health system by enabling providers to be better aware of how to access services, including information on what is available locally.

2) Provide **education and communication** to all key stakeholders and in particular **general practice** about the stepped care service and changes (PMH-P7.4).

The aim of this education and communication activity is to ensure key stakeholders are aware of what changes have occurred, and how this affects both the service providers and the clients. General practice will be addressed in particular through information sessions, practice manager/nurse network meetings and practice visits.

3) Provide **budget adjustment** requests to **Department of Health** to ensure that flexible funding is most suitably targeted to meet needs of the region for priority areas (PMH-P7.5).

The aim of this activity is to ensure that the proportion of funding between low, medium and high intensity services is adequate.

Procure:

1) Commission a **central intake and assessment service** to be delivered through Artius Health (PMH-P7.6).

Artius Health has been commissioned to provide a central intake and assessment service to ensure people find it easy to access services and can be referred to right level of care.

2) Establish / promote **stepped care brand**, future proofing any chance of provider change (PMH-P7.7).

The aim of this activity is to raise community and stakeholder awareness that the commissioned Stepped Care model is a Commonwealth Government-funded program. This will support both the national branding of the program, as well as reduce the impact should a need arise for a change in provider in the coming years.

3) Procure workforce development in key areas of workforce development strategic framework (PMH-P7.8).

The aim of this activity is have a strategic approach and resourcing to address workforce challenges in the region.

Target population cohort Describe the cohort that this activity will target. Population with, or at risk of, mental illness of whom cannot otherwise access or afford services delivered through the wider mental health system. No Coverage Whole PHN region Comprehensive stakeholder consultations were conducted on low intensity services by our PHN in 2016-17 and 2017-18. Consultation required for continuous improvement will be undertaken as part of ongoing evaluation and monitoring. Formal consultation with the sector including PHN Clinical and Community Councils will occur from time to time. Funded providers based in the PHN region will be engaged in the annual regional forum to identify what resources are available and how these can be maximised. Purpose-driven feedback will be sought from stakeholders through surveys, stakeholder feedback sessions and yarning circles. Regular consultation with consumer and carers will be undertaken through established Partners in Recovery reference groups. Informal consultation will occur through active representation of PHN staff at network.
