

Clinical Updates in Endocrinology and Cardiology

Wednesday 21st February | 6 – 7pm (AEST)

Virtual Event: [Register here](#)

Join Mater consultants **Professor David McIntyre**, senior staff specialist in Endocrinology and Obstetric Medicine, and **Associate Professor Karam Kostner**, Director of Cardiology at Mater Hospital Brisbane.

The **virtual** session, chaired by **Professor Claire Jackson**, will use a **case-based approach** to explore:

Endocrinology

- GLP-1 RA injectables in weight loss - the growing options
- Secondary and younger onset osteoporosis
- Metabolic bone diseases

Cardiology

- The new CVD risk calculator and changes to management
- New agents and targets in lipid lowering
- An update to heart failure management

Professor David McIntyre

Prof McIntyre trained in Australia and Belgium and is the senior staff specialist in **Endocrinology** and Obstetric Medicine at the Mater, where he specialises in the medical complications of pregnancy

Associate Professor Karam Kostner

A/Prof Kostner is the Director of **Cardiology** at Mater and has a particular interest in preventative cardiology and lipid disorders
